Cretaprint

Digital Synchronization System
for Ceramic Industry

Digital Synchronization System
for Ceramic Industry

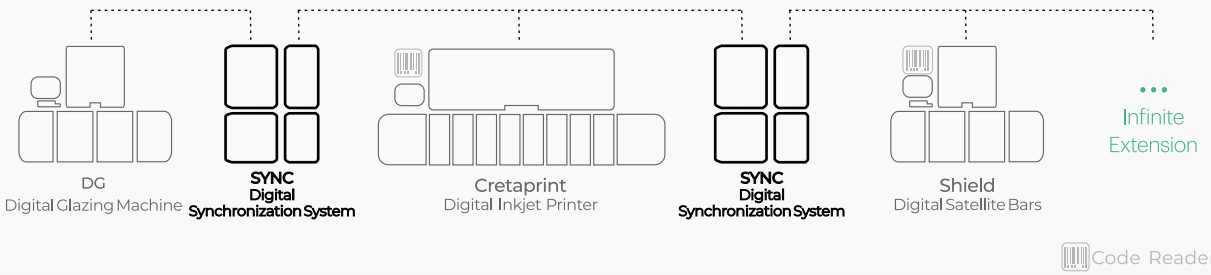

Making Industry Smarter!

Engineered for the Ceramics Industry: DPI Cretaprint's Digital Industrial Production Line.

Experience unparalleled modularity and scalability with a system designed for on-demand expansion and flexible configuration. Seamlessly integrate new functionalities and adapt effortlessly to evolving production needs, future-proofing your operations.

Digital Synchronization Workflow

Cretaprint

SYNC Digital Synchronization System

- Achieve seamless integration and data synergy between two digital printers.
- Enables flexible handling of a wider range of personalized and complex patterns to meet customized production requirements.

TECHNICAL DATA	SYNC 700	SYNC 1400	SYNC 2000
Max. Tile Width	300 ~ 600 mm	800 ~ 1200 mm	1200 ~ 1800 mm
Printing position	Edge / Bottom		
Supported Images	Up to 255		
Operating speed	Up to 75 m/min		
Operating direction	Right / Left		
Min. tile thickness	6 mm		
Max. tile thickness	50 mm		
Coding Unit Dimension	3150 L*800 W*1650 H mm	3150 L*800 W*1650 H mm	3700 L*800 W*1650 H mm
Reading Unit Dimension	2400 L*500 W*1500 H mm	2400 L*500 W*1500 H mm	3000 L*500 W*1500 H mm

*Note: Side marking requires tile thickness ≥ 5 mm; bottom marking has no thickness limit.
*Equipment dimensions are customizable to production requirements.

DPI is a global technology enterprise, specializes in the R&D, manufacturing, sales, and service of high-speed industrial digital inkjet printers. DPI delivers innovative digital printing solutions to diverse industries such as ceramics, building materials, textiles, and packaging. For more information, please visit www.dpi-t.com
